JEYAJOTHI D

Full Stack Developer

jeyajothi18082005@gmail.com | +91 6380887150 | Madurai, Tamil Nadu | LinkedIn

SUMMARY

Final-year Computer Science and Design student with a 3-month Full Stack Developer internship at Vexa Tech, building responsive web applications using React, JavaScript, HTML, and CSS. Experienced with Node.js, Express.js, MongoDB, and Firebase for backend and database work. Familiar with Java and MySQL fundamentals; currently learning Spring Boot. Comfortable with Git/GitHub version control and collaborative development workflows. Seeking a Software Developer role to apply full-stack development skills in a real-world engineering environment.

SKILLS

Programming Languages: JavaScript (ES6+), Python, Java (Familiar)
Frontend Development: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend Development: Node.js, Express.js, Authentication & Authorization, Spring Boot (Currently Learning)
Database Management: MongoDB, Firebase Firestore, SQL, Database Schema Design, MySQL (Familiar)
Tools: Git, GitHub

EXPERIENCE

Vexa Tech — Full Stack Developer Intern (Remote) | Nov 2025 – Jan 2026

- Built responsive, user-facing web application features using React, JavaScript, HTML, and CSS during a full stack development internship.
- Contributed to backend functionality and database integration alongside the development team.
- Used Git and GitHub for version control in a collaborative, remote development workflow.
- Worked with developers to implement and deliver assigned project features on schedule.
- Gained practical exposure to industry-standard software development practices, including code collaboration and iterative feature delivery.

PROJECTS

SalesPilot — AI-Powered Sales Automation & CRM Platform

- Developed a full-stack CRM platform using React/Vite and FastAPI, organized as an npm-workspaces monorepo with a dedicated Python backend service.
- Designed the persistence and asynchronous processing layer using PostgreSQL, Alembic, Redis, and Celery for background and scheduled task execution.
- Integrated the OpenAI API (GPT-4o) into the FastAPI backend to support AI-assisted functionality within the sales automation platform.
- Containerized development and production environments using Docker Compose, with Nginx, Certbot, Prometheus, Grafana, and PostgreSQL backup infrastructure.

Technologies: React, Vite, Python, FastAPI, PostgreSQL, Redis, Celery, Docker, OpenAI API

Lung Cancer Detection Using Machine Learning

- Developed a machine learning model to predict lung cancer using patient health data.
- Performed data preprocessing and feature selection before model training.
- Evaluated model performance using standard classification techniques.
- Built a simple interface to display prediction results.

Technologies: Python, Pandas, NumPy, Scikit-learn

Plant Disease Detection System

- Developed a machine learning-based web application to detect plant diseases from leaf images.
- Built an image classification model for early disease detection.
- Created a simple user interface for uploading images and displaying prediction results.
- Improved prediction accuracy through data preprocessing and model evaluation.

Technologies: Python, Flask, Machine Learning, Pandas, NumPy, Scikit-learn, HTML, CSS

EDUCATION

Sethu Institute of Technology — Bachelor of Engineering, Computer Science and Design
Kariapatti, Tamil Nadu, India | 2023 – 2027 (Pursuing)

St Joseph Girls High School — Higher Secondary Education (HSC), Computer Science
Madurai, Tamil Nadu

CERTIFICATIONS

- Full Stack Developer Internship – Vexa Tech
- React Basics – Karam Academy
- AI & ML Fundamentals Workshop – Shree Sakthi College of Engineering
- 5-Day IoT Workshop – Zeptspire Technologies
- Ideathon Participant – VIT Chennai
